

Q) Decline of IVC? (150 words)

Indus Valley Civilization is ~~the~~ one of the oldest civilization known to mankind. It is also known as Harappan Civilization as Harappa was the first site to be discovered. This civilization has striking similarities with the modern day world along with facilities like granaries and covered drainage, its decline was inevitable.

There is no unanimous theory as to what led to the decline of Indus valley civilization. An International team of Scientist suggests climate change may have caused the decline whereas another institutes study show that due to temperature change summer monsoon rains dried up making agriculture and life difficult.

IIT Kharagpur study shows that drying of Himalayan snow fed river that flowed through Rann of Kutch was the reason for decline of Mohenjodaro city.

Skeleton remains found in upper part of Mohenjodaro belonged to those who died due to flood and not killed by the Aryans. Hence this suggest that there was no invasion by Aryans.

As time passes by, the world will know more about Indus Valley Civilization, there will be a unanimous theory which will narrate the truth behind the decline of Indus Valley Civilization.
